In the State House, on the second floor...In the wake of Trump's victory, it is worth considering the historical context of the debate over the Supreme Court's ruling last decade that established the right to free speech. For anyone familiar with the history of the case, it will be difficult to miss the significance: First, the ruling was seen as making it easier to punish political speech than to prevent it: First, it made it possible to imprison critics of the government, even journalists. If Trump is a free speech racist, it seems a pretty strong argument, and one that was taken up with gusto in support of his presidential campaign.
